Dr. Hardman treats consumption, bronchitis, asthma, laryngitis and all diseases of the throat and lungs by Medicated Inhalation. The great point in the treatment of all human maladies, is to get at the disease in a direct manner. All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon which Inhalation is based. If the stomach is diseased, we take medicines directly into the stomach. If the tering for some time, (we think about two lungs are diseased, breathe or inhale medicated vapors into the lungs. Medicines are the antidotes to disease, and should be applied to the very seat of disease. Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct access to those intricate air-cells and tubes which lie out of reach of every other means of administering
